

RFQ 5FY19 Question 2:

I am little confused with your response. The RFQ Documentation I received is 22 pages long and provides basic “Building Specifications and Rough Schematic Diagram” on page 22. Could you please answer the following:

1. Is this for construction of the metal building only, with no MEP’s or finishes?

2. If yes, is there a concrete slab with appropriate the footers?

3. If no, how are we to know the specs of MEP’s, finishes, windows, doors, etc?

- *We are only looking for the Building cost no construction, no MEP's no concrete no windows only the building delivered to the Sheriff's Office. All Construction will be done in house.*
- *There will be construction documents but we just need the quote for a metal building kit that we are going to put up. We are the contractor. We just need the building. Construction documents probably won't be done until after this bid closes.*
